SIRIUS PCI COMPLIANCE SOLUTIONS

Sirius' dedicated Security & Risk Management experts can help you efficiently manage payment card data risks and maintain ongoing compliance. Our services ensure that organizations' payment card data processes and systems are compliant with industry standards, and protected from the threats of theft and fraud.

Contact your Sirius client executive for more information about our PCI compliancy services.

PAYMENT CARD INDUSTRY SECURITY SOLUTIONS

According to the Identity Theft Resource Center and CyberScout, the number of U.S. data breaches tracked in 2016 hit an all-time record of 1,093, with over 36 million records compromised—a 40-percent increase over the previous year.

PROTECTING CREDIT CARD DATA IS A KEY ELEMENT OF A COMPLETE DEFENSE STRATEGY

As a Payment Card Industry Qualified Security Assessor (PCI QSA) company, Sirius provides payment card security solutions for organizations that store, process and/or transmit payment card data. Sirius employs a team of PCI QSAs who can help you meet your PCI compliance objectives with a range of services that include:

- **Annual Penetration Testing:** The PCI Digital Security Standard (PCI DSS) requires ongoing testing of systems and processes that support your payment card environment. Sirius is certified to conduct the required annual penetration tests as identified by the PCI DSS.

- **Annual On-site Assessment:** We work directly with your team to make sure your environment remains in compliance with PCI DSS requirements and sub-requirements. You will receive a comprehensive assessment report with practical mitigation strategies.

- **Self-Assessment Assistance:** This solution guides organizations through the process of PCI self-assessment, and provides experienced insight into PCI DSS requirements.

- **PCI Readiness Assessment:** Sirius consultants have extensive knowledge of information systems and compliance regulations that impact organizations. They will help you identify and prioritize compliance initiatives, identify risks, and develop strategies for continuous compliance.

- **Scoping Assessment:** It's hard to get a solid PCI foundation if you don't know where your data is being stored, transmitted and processed. Sirius offers this solution to guide you on your first steps toward PCI compliance.

The Sirius Security & Risk Management Solutions team provides a comprehensive approach to IT security by helping you protect every aspect of your organization. To learn more, visit siriuscom.com/security.
