## SIRIUS PEN TEST

Sirius' certified security experts can help you determine potential threats and identify any gaps in your security posture by performing a pen test, which helps organizations assess potentially devastating impacts, and understand the countermeasures to reduce further risk.

Contact your Sirius client executive for more information about our pen testing solutions and other offerings from our comprehensive range of security services.

---

# PENETRATION TESTING (PEN TEST)

Cybercrime is one of the greatest threats to organizations. According to CSO, global ransomware damages costs are predicted to exceed \$5 billion in 2017, and the human attack surface will reach 4 billion people by 2020. However, insider breaches can also wreak havoc on organizations.

## ASSESSING YOUR OVERALL SECURITY POSTURE

Sirius offers pen testing solutions to uncover potentially devastating gaps in your security landscape, and determine whether your defenses are sufficient to withstand attack. We will also show you how to mitigate these risks to avoid compromises. Our pen test report covers your:

- **Applications** to ensure that business-critical applications are resistant to attack, whether they are on-prem, hosted in the cloud, or hybrid
- **Network** to ensure that your computer systems are resistant to attempts of destroying, exposing, altering, disabling, stealing or gaining unauthorized access
- **Mobile** to determine the potential for exploitation of mobile device and mobile application vulnerabilities
- **IoT** to determine any vulnerabilities within the device, including embedded software, data, mobile application and the cloud
- **Encryption** to ensure that sufficient encryption methods are in place
- **Hardware** to ensure that all computer hardware is safeguarded
- **Software** to identify any gaps within your software that may lead to security breaches

The Sirius Security & Risk Management Solutions team provides a comprehensive approach to IT security by helping you protect every aspect of your organization. To learn more, visit [siriuscom.com/security](http://siriuscom.com/security).
