

MEMORIALCARE TECHNOLOGY AND TRAINING CENTER POWERED BY SIRIUS

A TECHNOLOGY CENTER FOR HEALTHCARE EXPERIMENTATION, MEETING AND TRAINING

The MemorialCare Technology and Training Center Powered by Sirius (MTC) was built by MemorialCare and Sirius to serve the unique needs of the healthcare industry. Specifically, it was created with the vision to use technology as an accelerant to improve patient care, patient outcomes, and organizational efficiencies.

MTC is a lab focused on electronic health record (EHR) systems software. A venue for client experimentation, meeting and training, the Center's fully populated EHR installation has a complete stack of technologies capable of running a 2,000-bed hospital. It holds multiple technologies from Sirius' industry-leading partners, including Cisco, Citrix, F5, IBM, NetApp, Nutanix, Veritas, VMware and more.

Located near MemorialCare's Orange Coast Medical Center in Orange County, CA, the 5,000-square-foot, state-of-the-art facility is complete with a standalone, isolated data center and simulation lab. The MTC provides a platform for exploring EHR functionality and requirements through:

- Proofs of concepts (POCs)
- Testing new EHR modules and upgrades
- Testing new EHR hardware and software configurations
- Testing new technologies, including hardware and software, and modified configurations
- Innovation around creative clinical workflows and integrated third-party solutions

TALK TO OUR HEALTHCARE EXPERTS ABOUT BOOKING THE MTC

The MTC is isolated from MemorialCare's operational environment. It includes a comprehensive collection of the latest technologies (including servers, storage, network, software and tools) to explore various aspects and requirements for a wide range of healthcare and EHR operational needs. Sirius Healthcare practice leaders are available for facilitating. Contact Sirius for further information about usage options and scheduling at 888-404-5468.

CHIME FOUNDATION

Sirius is a proud member of the CHIME Foundation, a non-profit organization dedicated to thought leadership in the healthcare industry.
