

Sirius Warehousing, Integration and Deployment Services - COVID-19

As our World seeks to contain the spread of COVID-19, Sirius is dedicated to following CDC preventative measures while seeking ways to provide our clients and partners with the solutions they need to minimize disruption. Sirius Warehousing, Integration and Deployment Services is no exception. How?

Sirius Smart Hands & Deployment Services Capabilities

Traveling is out of the question during the current pandemic situation, but you still need to get the job done. Our deployment team is ready to help. Sirius Smart Hands allows us to get you the personnel assets you need to stand up and implement projects. Availability will vary by region.

What is Smart Hands? It's a service/tool that identifies qualified personnel in your area who can go to your location for a specified amount of time to execute instructions from a Sirius Run Book or Sirius Project Coordinator.

The bottom line? No need to travel long distances against recommendations by the CDC to get the job done. Deployment Services can find people in close proximity to the opportunity. Contact deployment@siriuscom.com for more.

Sirius Warehouse & Integration Center (SWIC) Capabilities

As the pandemic has unfolded, SWIC has seen increased demand from both partners and clients to accelerate orders so that they can store them in Sirius' warehouse. We're ready and equipped to handle this influx.

During the pandemic situation, the SWIC will remain open for business. That means we are accepting inventory deliveries and we are carrying out Integration services to minimize disruption. In the case that shipping docs are closed, shipments can be rerouted to Sirius' warehouse.

We are dedicated to keeping all personnel safe. To this end, we are rotating personnel in and out of the SWIC to make sure we do not have too many people in close proximity to each other in compliance with CDC recommendations. Contact swic@siriuscom.com with any needs or questions.
