

MANAGING TECHNOLOGY IS CHALLENGING. SIRIUS CAN HELP.

Embracing a “cloud first” approach requires modernizing your applications to work in a cloud infrastructure. If you’re moving workloads off-premises, you’ll have to secure your information regardless of where it resides. And if that’s not enough, you are likely under pressure to do more with less.

Sirius Managed Services can help accelerate your shift to a high-performing digital business by serving as your single provider of solutions and talent for IT application transformation, engineering and operations.

SIRIUS MANAGED SERVICES

DELIVER SERVICES FASTER, BETTER, AND MORE COST-EFFECTIVELY

In today’s ever-changing climate where market disruption is the norm, your business needs to keep innovating to stay relevant and vigilant in protecting your data and overall brand. Faced with these monumental challenges, you may be thinking:

- “I can’t do it alone”
- “I can’t keep up”
- “I can’t afford the risk”

Sirius Managed Services will help you:

- Move faster by increasing and focusing the productivity of your staff
- Accelerate cloud adoption
- Ensure you are continuously compliant and secure

With a staff of more than 300 technical professionals who hold technical certifications across all infrastructure platforms, you can feel confident knowing that Sirius has the expertise, scale and ITIL-based processes to meet the strictest SLAs.

THE SIRIUS DIFFERENCE

We optimize your environment before onboarding and throughout the life of the relationship. You’ll engage directly with Level 2 & 3 engineers from one of our five Command Centers located in Omaha, NE; Raleigh, NC; Elk Grove Village, IL; Toronto, ON; or Chennai, India. We use market-leading, ITIL-aligned management tools to ensure repeatable and consistent service delivery.

As a leading IT solutions provider, Sirius delivers end-to-end solutions including strategy development, technology selection, implementation and operation. We offer multiple delivery models, including on-premises, off-premises, cloud, and as-a-Service models.

OUR DATA CENTERS

Sirius data centers help you:

- Have full control of your data center infrastructure in a customizable, private and secure suite
- Access higher data density and floor space options, so you maximize your compute per square foot and reduce capital expenses
- Fit into a smaller footprint with more compute power, so you save on operating costs, manage less space, and have more room to grow

Our state-of-the-art, Uptime Certified Tier III data center near Chicago is designed specifically for organizations looking for flexible, private and secure data center suite options.

Let Sirius help you evolve, scale and secure your IT, while you focus on driving your business forward. Contact us today at MSsales@siriuscom.com or visit siriuscom.com/managed.

OneTouch Support offers premium support from senior engineers familiar with your environment.

Managed Security Services offer proactive management services to reduce your security burden, with a focus on continuous engineering and tuning. We secure both your on-premise and future-state environments.
