

## WHY SIRIUS?

Sirius Managed Services is a top-ranked global MSP that supports clients in both client-based and Sirius-provided data centers.

Sirius is a Citrix Platinum Solution Advisor Partner with the highest level of expertise of the Citrix solution portfolio, including these specializations:

- Virtualization
- Mobility Management
- Networking for Data Center
- Networking for Apps and Mobile Security

# SIRIUS MANAGED CITRIX SERVICES FULLY MANAGED VIRTUAL APPS AND DESKTOPS

The evolution of how and where we work has expanded the diversity of apps, devices, infrastructures, and even people's working styles. IT is now expected to enable a "work from anywhere, anytime, on any device" model, but even the most prepared IT team can be challenged with the effort to provision the necessary hardware and software, provide training and ongoing support, and ensure security and compliance to keep at-home workers productive.

Sirius is uniquely positioned to help organizations overcome this challenge—especially during a time of crisis. Sirius has partnered with Citrix to design, implement and manage Citrix Virtual Apps and Desktops™ so you can deliver applications and desktops to any device while strengthening data security, reducing costs and increasing user productivity.

## THE SIRIUS ADVANTAGE THAT COMES WITH CITRIX EXPERTISE

As a Citrix Platinum Solution Advisor, Sirius Managed Services has the top talent and resources to support your organization's Citrix® infrastructure. Included in our Managed Citrix Services are all the operational and systems management tasks you would expect to support your environment, from troubleshooting Citrix infrastructure components to proactively monitoring and performing corrective action on alerts.

Sirius Managed Services brings world-class monitoring and management to ensure that Citrix Virtual Apps and Desktops are always available, while providing the consistent end-user experience that is critical for organizations. Sirius has the industry's best experience, knowledge and tools to manage, monitor and support complex Citrix implementations and infrastructure.
